An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

In claim 1, line 12, "one" has been changed to - - rotary - - and after "motion", - - and includes the step of spin welding a closure to the side wall portion - - .

Claim 4 has been cancelled.

Claims 2, 3, and 9-23, drawn to non-elected inventions and a non-elected species, have been cancelled.

Authorization for this examiner's amendment was given in a telephone interview with Vincent L. Carney on April 6, 2005.

The following is an examiner's statement of reasons for allowance: Yamada (U.S. Patent No. 5,693,223), Nakaso (U.S. Patent No. 5,360,544), and Lacey (U.S. Patent No. 6,280,619) are considered to be the closest prior art because Yamada (U.S. Patent No. 5,693,223) and Nakaso (U.S. Patent No. 5,360,544) disclose similar apparatus and Lacey (U.S. Patent No. 6,280,619) discloses spin welding. The case has been allowed because the recited combination of steps would not have been obvious from Yamada (U.S. Patent No. 5,693,223), Nakaso (U.S. Patent No. 5,360,544), and Lacey (U.S. Patent No. 6,280,619). 10/389,626 has been considered with regard to double patenting. However, the snap-on species is considered to be patentably distinct from the spin weld species. As such, there is no double patenting issue between 10/389,626 and the instant case.
